- dedicated functions
- external integrations
- use of OCR technology
- ongoing support
- training

Stages of collaboration

1

**Recognition of
needs**

2

Technical Analysis

3

**Plan of
implementation**

4

Realisation

Time & materials settlement

Why is it profitable?

You pay for real work that is done by the team of software house. Thanks to Sopchy's panel, you can always control the progress and change the conception during the work.

Estimation of IT projects is not always easy. Fixed price estimate usually includes the amount that covers project risk. In time&materials settlement there's no need to add it.

Planned costs only - full control!

Our contract may establish the limit of hours within the month. You can monitor precise time spent on your project anytime in our panel.

Hour rate (excl vat)

E-commerce, web design

from £35/h

depending on the amount of hours in the month

Web and mobile applications

from £45/h

depending on the amount of hours in the month

We play as a team - together we set and realise goals

At each stage of the cooperation, we look at the project from the perspective of our customers and become IT department of their companies. Thanks to this we can understand their business needs and propose the optimal way to meet them.
